Prinergy Device Connectivity for Digital Presses Start-Up Assistance Overview and Deliverables

Kodak® Prinergy® Device Connectivity for Digital Presses start-up assistance (SUA) is an on-site service that assists customers who are connecting their Prinergy software workflow to a Digital Print output device via JDF-generated job tickets.

A Kodak applications specialist will help the customer to install and configure the Digital Print option and assist operators to become more proficient with its use in their environment.

Site Visit

The activities below are designed for Digital Print devices that are approved for connectivity to the Prinergy software. The activities include assisting the customer with setting up a connection to a maximum of two Digital Print devices. Supported digital printers and their controllers are listed in the *Prinergy Digital Print Installation and Configuration Guide*.

- Install and configure (approximately two hours)
- Demonstrate JDF setup and PDF settings (approximately one hour)
- Discuss trapping preferences (approximately one hour)
- Discuss color-mapping preferences. (approximately two hours)

Suggested durations are only a starting point; they can be changed, depending on the customer's needs.

Service Prerequisites and Customer Responsibilities

Before Starting SUA Service Delivery

To obtain maximum value from the SUA service, the Prinergy and Digital Print device installation must be completed and operational before the start of the SUA service. Any uncompleted installation issues will not result in a longer SUA service period.

During SUA Service Delivery

Everyone (two operators) participating in the SUA should be available at all times during the SUA service.

The following table shows the responsibilities of Kodak, the customer, and any third parties during the SUA for each supported setup:

Press Manufacturer	Press Name	Controller Manufacturer	Controller Name	Controller JDF Setup Requirements
Xerox®	DocuColor digital production press	Kodak	Spire	The customer must set up. Kodak can assist with connectivity. The default controller setup can be used for testing connectivity.
Xerox	DocuColor digital production press	Xerox	DocuSP	The customer must purchase and set up the Xerox FreeFlow® Print Manager. If the customer has not set up and tested the FreeFlow Print Manager, a Xerox representative must be on-site during the setup.
HP®	Indigo® digital production color press	Kodak	Production Stream	The customer must set up. Kodak can assist with connectivity. The default controller setup can be used for testing connectivity.
HP	Indigo press	HP	Production Flow	The customer must set up. An HP representative must be on-site during the setup.
HP	Indigo press	HP	Production Manager	The customer must set up. An HP representative must be on-site during the setup.
Konica Minolta®	bizhub™ PRO printer	Kodak	Image Controller	The customer must set up. Kodak can assist with connectivity. The default controller setup can be used for testing connectivity.
Kodak	NexPress® digital production color press	Kodak	NexStation™ V	The customer must set up. Kodak can assist with connectivity. The default controller setup can be used for testing connectivity.
Kodak	NexPress press	Kodak	NexStation Vcs	The customer must set up. Kodak can assist with connectivity. The default controller setup can be used for testing connectivity.

After SUA Service Delivery

After completing the Prinergy Device Connectivity for Digital Presses start-up assistance, the customer is expected to have operational skills. More information is available in the following resources:

- *Prinergy Digital Print Installation and Configuration Guide*
- Prinergy Help
- Digital Print controller documentation

Limitations and Exclusions

Prinergy Device Connectivity for Digital Presses start-up assistance enables customers to acquire operational skills and advice from a Kodak applications specialist. SUA is a fixed duration service—if additional time is required on-site, it will be provided on a chargeable basis, subject to limitations of scheduling and local availability.

Start-up assistance occurs after output device installation is completed. The SUA checklist shall not be a barrier to completion of the installation. Start-up assistance does not include system or device calibration during.

The services described in this statement of work are provided on an “as is” and “best efforts” basis. Except as may be stated specifically in this statement of work, Kodak expressly disclaims all warranties of any kind, whether express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, and non-infringement.
