Internal 731-01315A-EN Rev A

Revised January 2008

Introduction

This document describes how to enable a person with non-administrative rights to access and use the Kodak® Magnus™ 800 computer and the Magnus 800 Controller software.

Create a New User

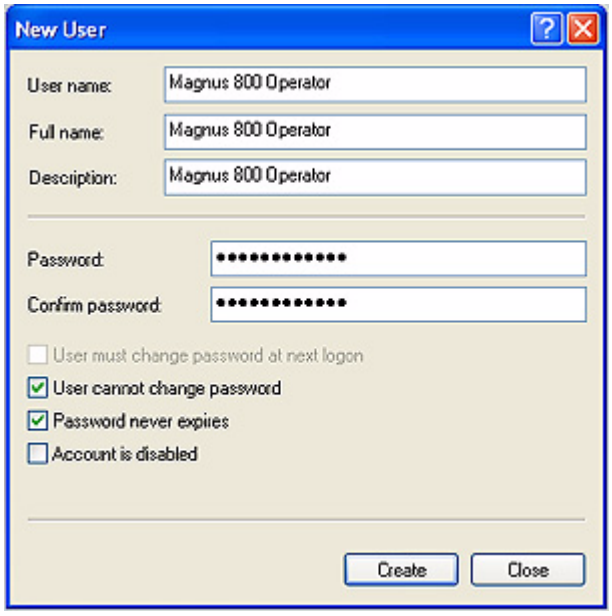

1. Log into Microsoft® Windows® with administrative rights.
2. Close all running applications.
3. On the Desktop, right-click on **My Computer** and select **Manage**.

4. In the Computer Management dialog box, expand **Local Users and Groups**, right-click on **Users**, and then select **New User...**.

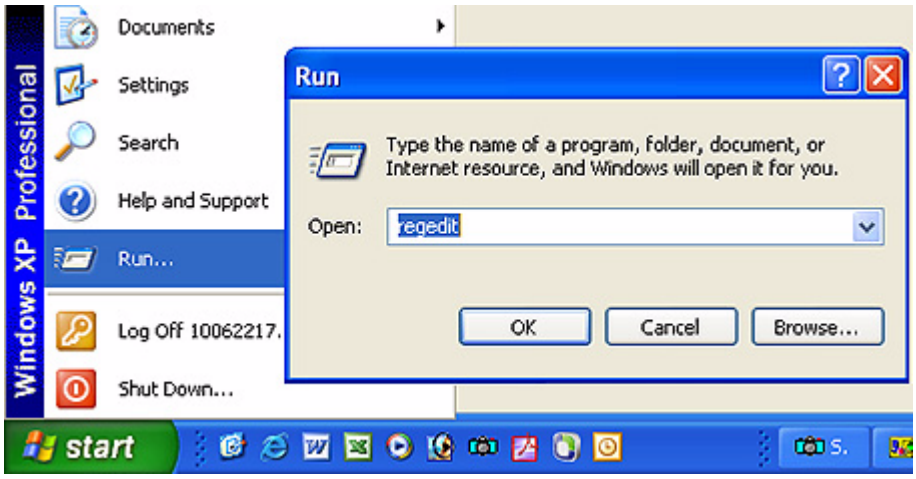

5. Enter the required details in the New User dialog box and then click **Create**.

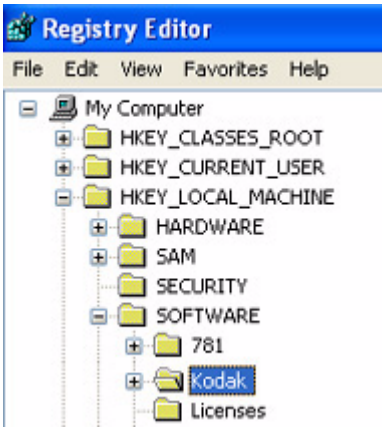

Modify The User Permissions

This section describes how to modify the Kodak and Creo registry keys to enable permissions for non-administrators.

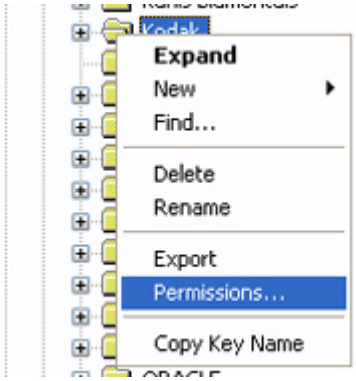

1. In the **Start** menu select **Run**. The Run dialog box appears.
   In the **Open** box, type **regedit** and click **OK**.

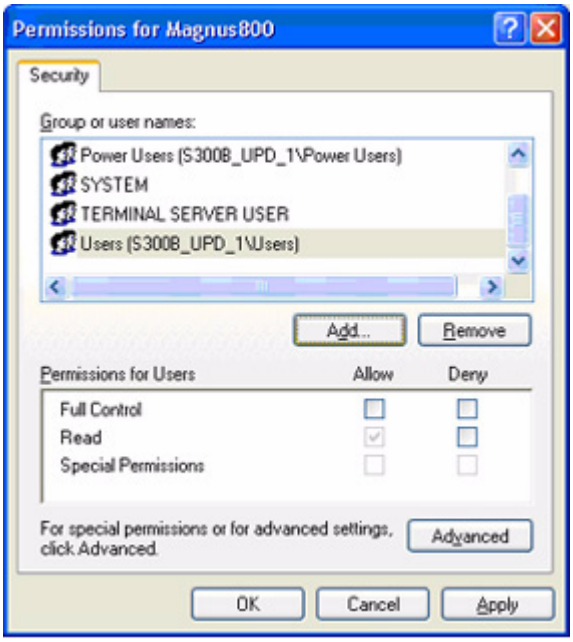

2. In the Registry Editor dialog box, locate the **Kodak** registry key: HKEY_LOCAL-MACHINES\SOFTWARE**Kodak**.

3. Right-click on **Kodak** and select **Permissions**.

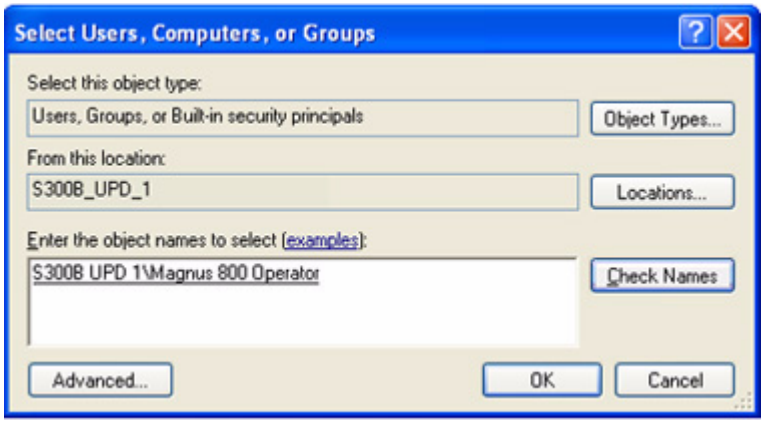

4. In the Permissions for Magnus800 dialog box, click **Add**.

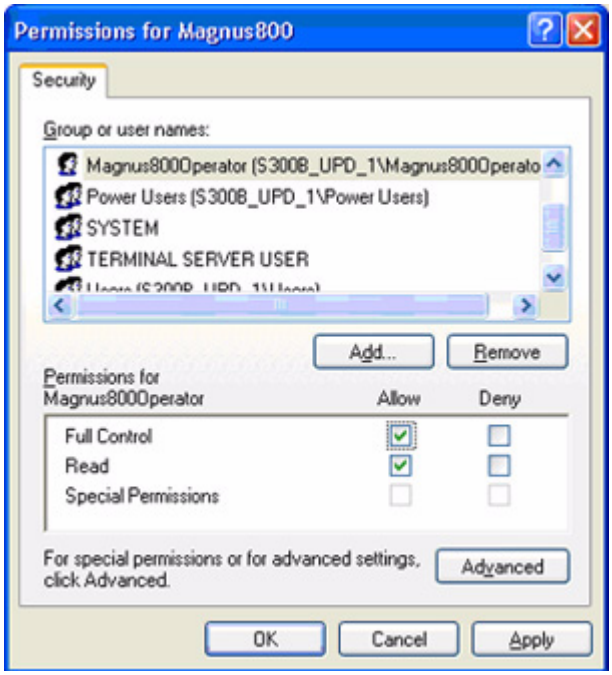

5. In the Select Users, Computers, or Groups dialog box, type **Magnus 800 Operator** in the **Enter the object names to select** box.

6. Click **Check Names**. Wait until the qualified name appears in the **Enter the object names to select** box and then click **OK**.

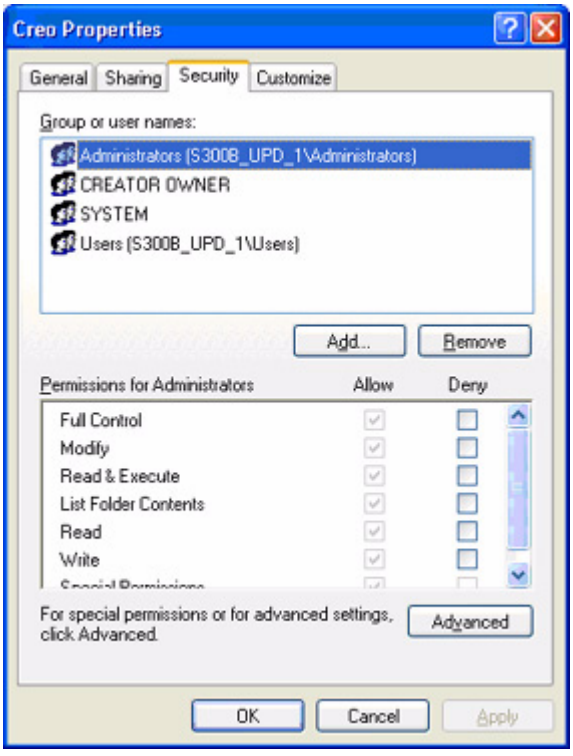

7. In the Permissions for Magnus 800 dialog box, ensure the user's name appears in the **Groups or user names** box. Select the name and check the **Full Control Allow** check box.

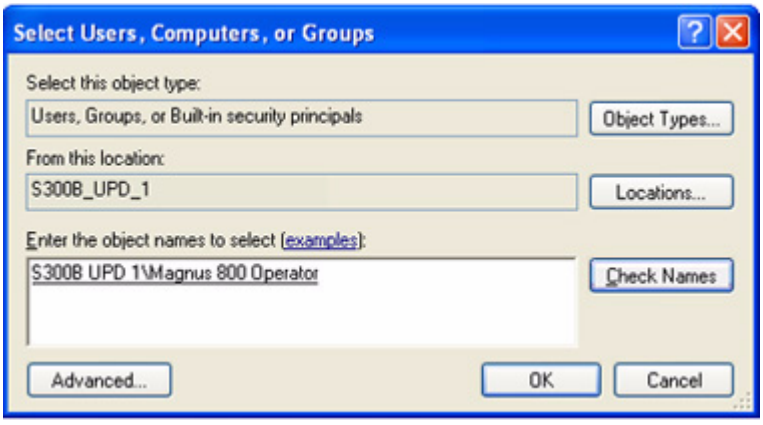

8. Repeat steps 1-7 to modify the Creo registry key: HKEY_LOCAL-MACHINES\SOFTWARE**Creo**.

Modify The Application Folder Permissions

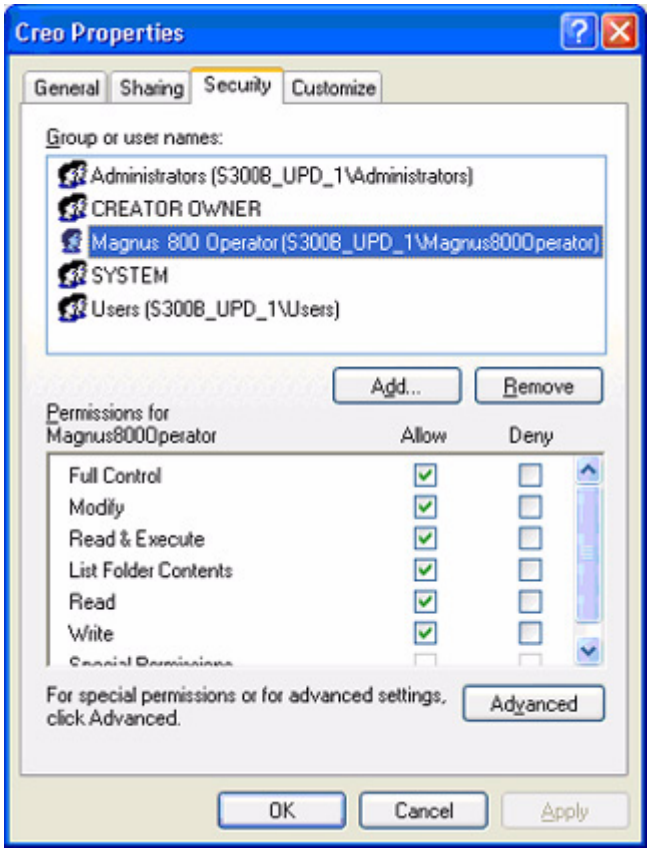

1. Right-click on the **Magnus** folder (C:\Magnus) and select **Properties**.
2. In the Creo Properties dialog box, click the **Security** tab and then click **Add**.

3. In the Select Users, Computers, or Groups dialog box, type **Magnus 800 Operator** in the **Enter the object names to select** box.
4. Click **Check Names**. Wait until the qualified name appears in the **Enter the object names to select** box and then click **OK**.

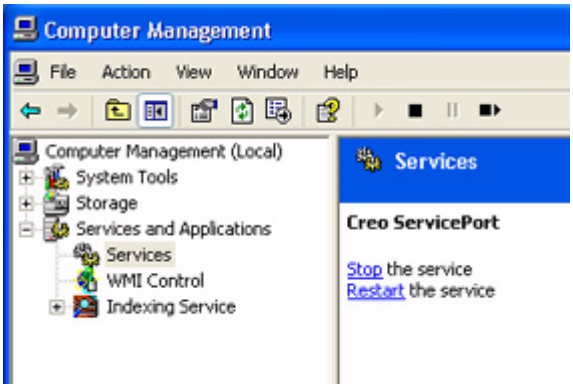

5. Perform the following actions in the **Security** tab of the Creo Properties dialog box.
   - In the **Group or user name** box, select the name of the user (Magnus 800 Operator).
   - Check the **Full Control Allow** checkbox.
   - Click **OK**.

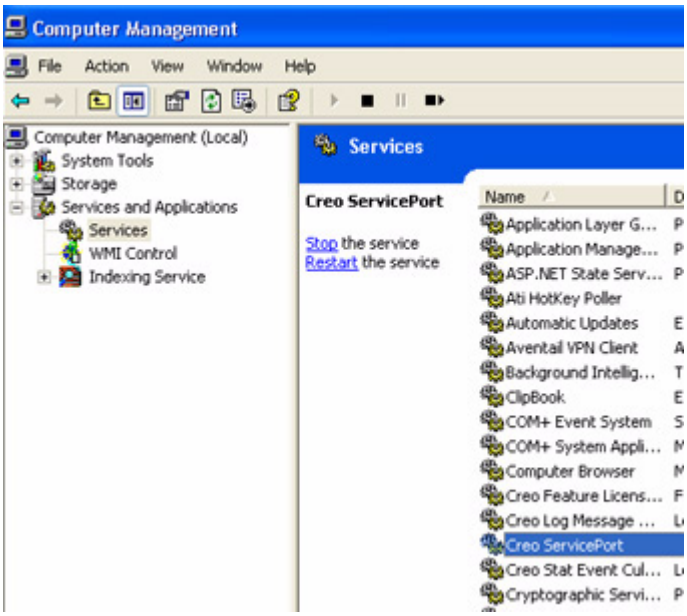

6. Repeat steps 1-5 to modify the permissions for the **C:\Kodak** folder.
7. Repeat steps 1-5 to modify the permissions for the **C:\ServiceShell** folder.

Disable Non-Mission Critical Services

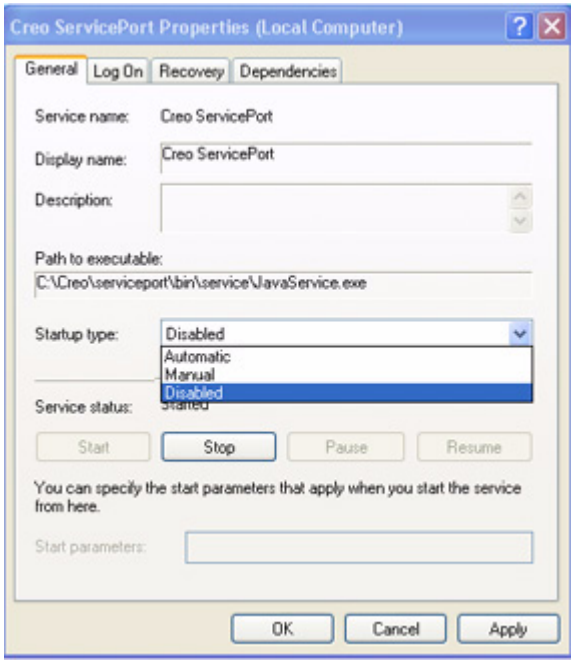

1. Right-click **My Computer** and select **Manage**.
2. In the Computer Management dialog box, click **Services and Applications**, and then click **Services**.

3. In the Services pane of the Computer Management dialog box, double-click **Creo ServicePort**.

4. In the Creo ServicePort Properties dialog box, select **Disabled** in the **Startup Type** list, and then click **OK**.

5. In the Services pane of the Computer Management dialog box, double-click **Creo Stat Event Culvert**.
6. In the Creo Stat Event Culvert dialog box, select **Disabled** in the **Startup Type** list, and then click **OK**.
7. Restart the Magnus 800 Controller computer.

Install The WinZip Application

1. If you did not restart the Magnus 800 Controller computer after the previous section, do so now.
2. Right-click on any file located on the Magnus 800 Controller computer; Select the **WinZip** application, and then select **Add to Zip file** from the list.
   If the **WinZip** application was correctly installed, the **WinZip Installation Wizard** appears and guides you through the remainder of the **WinZip** installation process.

   If the **WinZip** application fails to install, perform the following actions:

   - Restart the Magnus 800 Controller computer and login as an administrator.
   - Resinstall the **WinZip** application.
