Technical Bulletin

Installing a Sentinel SuperPro USB Dongle

This technical bulletin describes how to install the SafeNet® Sentinel™ SuperPro USB dongle for Kodak® UpFront® software. The dongle is a copy-protection device that plugs into a USB port on your computer. The dongle can also be connected to a USB hub. For the Sentinel SuperPro dongle to function, your computer's BIOS setting for the USB port must be set to **Enabled**.

1. Set the dongle aside for later use (do not insert it).
2. Install the UpFront software, and select the **Sentinel SuperPro (USB or parallel port)** check box only. Do not select the other check box.

3. When the installation is complete, insert the dongle into the USB port or USB hub.
4. Restart your computer.
5. Start UpFront.
6. When you see the Welcome to Kodak UpFront dialog box, type your dongle password.

For more information about UpFront, go to http://graphics.kodak.com/upfront.

About Kodak Graphic Communications Group (GCG)

The leading provider of graphic communications solutions worldwide, Kodak's Graphic Communications Group (GCG) offers image capture systems; professional color, copydot, and high-speed document scanning systems; inkjet printing and proofing systems; workflow and color management software; thermal imaging devices for film, plates, and proofs; high-quality proofing media, printing plates, and recording film; on-demand color and black-and-white printing systems; data storage products; and professional services. With corporate headquarters located in Rochester, N.Y., Kodak (NYSE: EK) has the largest global sales force and is committed to a digitally oriented growth strategy.
