Table Fan Replacement

Applies to	ThermoFlex
Background	The table fans provide air pressure to float the media laying on the table. This allows the media to be easily moved about on the table.
Tools and parts	7mm combination wrench
Steps	1. Disconnect the back-shell connector at the fan 2. Remove the two 7mm nuts holding the fan to the table 3. Remove the fan. 4. Install a new fan 5. Tighten the two 7mm nuts using loctite 6. Connect the back-shell connector
