ECO #: A356

Creo Products Inc.

Status: C Completed
Date Received: 04/02/199
Product: CTP Computer to Plate(PlateSetter)
Date Released: 04/08/199
Origin By: YUN LAM LI
Date Completed: 03/06/199
Coordinator:
Assigned ECR #s
Estimate Date:
Implementation Cost: $0.00 A539
Copy N
Product Cost Variance: $0.00

ECO Description

The 16-3458A SCSI III BP2-WS cable assembly is updated to have a female screw post and use the new 57-3994A SCSI jack screw. This will provide wire protection and strain relief when connected to the 11-0404A engine module assembly.
The previous SCSI design was responsible for data transfer errors during CTP integration. The cable would be removed and it would have a loose wire at the interface panel end.
