Add the following people to this ECO's distribution list:

Print or type name:	Date:

Status	Service class	Production class	Reason for change
IN Inactive	R Retrofit	1 Retrofit all units	1 Design
OB Obsolete	S Next Call	2 Finished goods	2 Manufacturing
PR Pre-release	F Next Fail	3 WIP	3 Assembly
	T Their Cost	4 Future	4 Documentation
	N Not Up-Gradable	5 Documentation	5 Cost
	N/A Not Applicable		6 Maintenance
			7 Reliability
			8 Software
			9 Other

Details of Problem and the Changes

Details: These boards were ECO'd on B747 to add a SPI filter. This changed the reliabilty of the part and should therefore have been a change in Version. ECO B747 is being applied as a mandatory upgrade.

(keep typing to get more space within the box..."details" will move onto page 2 if needed)

Documentation Changes

Part #	Rev/Status From	To	Documents Type	Status/Resp	Type	Status/Resp	Type	Status/Resp	Type	Status/Resp

(tab to get more lines for more parts)

Document Status Codes AT – Updated document is attached RL – Redlined document is attached
UP – No document attached, update will follow NC – No changes required to document

Responsibility Name of Creo employee who is responsible for updating the document

Production Implementation

Part #	Qty in Stock	Action	Qty in Process	Job # / PO #	Action	Comments
10-1419B-B		Renumber to 10-1419C-A
