Configuring Platesetter Control Interface for the ThermoFlex Output Device

Document Number: 78-0046A-A
Release Date: October 21, 1999

After installing the Platesetter Control Interface and TIFF Downloader, use the following instructions to configure the application to drive the ThermoFlex output device.

Configuring the Load Menu

These steps configure the **load** menu to ask the operator to load plate size X by Y to the ThermoFlex rather than the Trendsetter output device.

To configure the load menu:

1. Navigate to the following location:
   System Drive:\Platesetter\bin
2. Create a folder called **Original**.
3. Copy the following files to the **Original** folder:
   - **Ctpws.exe**
   - **RIF.exe**
4. Insert the Resource CD in the CD ROM drive.
5. Navigate to: **CD ROM:\Resource\TFX Load Fix for AWS\1.6b2Intel**.
6. Copy all files in the **1.6b2Intel** folder to the following location:
   System Drive:\Platesetter\bin
7. When prompted by the **overwrite** menu, select **Yes**.

The Load menu is configured.

Configuring the Interface for Trendsetter Use

These steps configure the Platesetter Control Interface for use with a Trendsetter rather than a Platesetter output device.

To configure Platesetter Control Interface for Trendsetter use:

1. From the **Start** menu, select **Run**.
2. In the Run window type **REGEDT32**, and click **OK**.
3. When the registry editor is opened, select the following window:
   HKEY_LOCAL_MACHINE on Local Machine
4. Navigate to the following location:
   Software\Creo\RIPSW\1.6b2\CtpwsConfig
5. Set the following keys to 1:
   VLF
   Trendsetter
6. Close the registry editor

The Platesetter Control Interface is configured for Trendsetter use.

You can now run the Platesetter Control Interface.
