Connecting Prinergy to Dolev Image setters

CS Xpose connectivity kits and other part numbers…

02-4322D-15	Prinergy Dolev 800 and 800V2 Renderstation	$ 20,600	Prinergy Optiplex GX 260 2.4GHz CPU, 1 GB RAM, 1000VA UPS. Direct Hi-Res Renderer JTP Dolev 800 and 800V2 Device Control Kit (Includes Device Control Software & CTP Connection Kit)
02-4322D-16	Prinergy Dolev 800V3 Renderstation	$ 20,600	Prinergy Optiplex GX 260 2.4GHz CPU, 1 GB RAM, 1000VA UPS. Direct Hi-Res Renderer JTP Dolev 800V3 Device Control Kit (Includes Device Control Software & CTP Connection Kit)
02-4322D-13	Prinergy Dolev 800 and 800V2 Renderstation (Factory Upgrade)	$ 11,400	Prinergy Optiplex GX 260 2.4GHz CPU, 1 GB RAM, 1000VA UPS. Prinergy Hi-Res Renderer Direct (for Dolev) Dolev 800 and 800V2 Device Control Kit (Includes Device Control Software & CTP Connection Kit).
02-4322D-14	Prinergy Dolev 800V3 Renderstation (Factory Upgrade)	$ 11,400	Prinergy Optiplex GX 260 2.4GHz CPU, 1 GB RAM, 1000VA UPS. Prinergy Hi-Res Renderer Direct (for Dolev) Dolev 800V3 Device Control Kit (Includes Device Control Software & CTP Connection Kit)
22-0310A	Prinergy to Dolev 800V3 Direct Device Control Kit	$ 2,500	Allows a Prinergy system to drive Dolev 800V3 image setters using a direct connection.
632-00014A	Prinergy to Dolev 800 & 800V2 Direct Device Control Kit	$ 2,500	Allows a Prinergy system to drive Dolev 800 and 800V2 image setters using a direct connection.

Feature set for CS Xpose

CS Xpose has the capacity to do separation-ganging with loose-page in either “time-save” or “film-save” mode. This means that different separations can be imaged on one piece of film. The Prinergy-CS Xpose workflow also has the ability to select different pages in the same job and image all separations on one piece of film. CS Xpose is only limited in that it cannot select different separations from different pages and expose on one piece of film e.g. it cannot image the Magenta separation from page one and the yellow separation from page two **only**.

Lastly, Xpose has the option of adding marks to the film pieces, including file name, date/time, and separation name. Any customer switching from PSM (Mac) to Xpose (Intel) for Dolev connectivity will not lose any feature in with regard to outputting film.

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates and proofs; professional color and copydot scanning systems; and workflow management software. Creo is also an Original Equipment Manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers.
