CS Xpose update #1 for CS Xpose Version 2.00.064

IMPORTANT: CS Xpose 2.00.064 must already be installed before you install update 001.

What this zip file contains:

1. CS Xpose Upd 1.EXE
2. UninstCSXposeUpd1.EXE

To install the update:

1. Install CS Xpose 2.00.064. IF CS Xpose is already installed on the workstation, proceed to step 2.
2. On the Prinergy Workstation, close all applications and windows.
3. Restart the Prinergy Workstation.
4. Double-click CS Xpose Upd 1, to open the update installation wizard.
5. Follow the wizard's instructions.
6. When the wizard installation is complete, the workstation restarts. Note: You must always restart the Prinergy workstation after each software and update installation.

To check that the update has been installed:

1. Start CS Xpose.
2. From the Help menu, select About CS Xpose.
3. The About CS Xpose version should read 2.00.064 upd 001.

To uninstall the update:

1. On the Prinergy Workstation, close all applications and windows.
2. Restart the Prinergy Workstation.
3. Double-click UninstCSXposeUpd1, to open the remove installation wizard.
4. Follow the wizard's instructions.
5. When the remove installation wizard is complete, the workstation restarts. The Prinergy Workstation now contains CS Xpose released version 2.00.064.
