QUICK START GUIDE

Win2K and RSS

Setting up the Creo Nexus RSS to run with Service Shell on Windows 2000 Machines

Preamble:

This outlines how to get aWin2K PC set up with RSS working with Service Shell to connect to a device. Target audience — Creo engineers.

What you need:

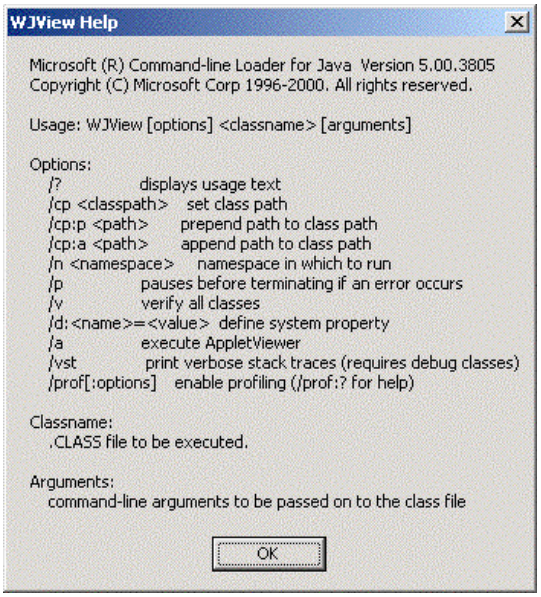

Win2K PC
Service Shell
Ethernet or Modem

What you do:

Check if JAVA is on your workstation :

1 run jview – your display may flash a black command line screen

2 run wjview — you should see:

3 Install the basic client tools — URL is \\rcterminator\\pictures\\RssServiceShell\\RSSClientTools_20020314.exe

4 Patch this software to use the Service Shell from the RSS, as follows:

1. Copy

\\rcterminator\\pictures\\RssServiceShell\\sshell.bat

to c:\rss (You may need to edit the path for ServiceShell batch file)

2. Replace c:\rss\start_app.class by \\rcterminator\\pictures\\RssServiceShell\start_app.class
3. Take the registry file \\rcterminator\\pictures\\RssServiceShell\sshell.reg
4. Double click it for installation.

Now you are ready to connect. Follow the basic connection procedures outlined in

- Using a Modem and Service Shell to Connect to Remote Machines, found at

http://creonet.creo.com/documents/Using%20a%20Modem%20and%20Service%20Shell%20to%20Connect%20to%20Remote%20Machines.pdf

and

- Connecting to a Remote Machine using Terminal Services and RSS, found at

Example:

Connect to the Manta Beta in Montreal

1. Launch your browser, Internet Explorer.
2. In the Address: go to http://van-rss.creo.com/
3. You may get an Apache error, this is an artifact of our internal firewall. Click IE's refresh button.
4. Wait for the user interface to display
5. On the left hand side, click on Change Region
6. From the drop down menu in the center of the screen, select North America East (which is the area Montreal is located in)
7. Click Change Region
8. Click Select Customer
9. From the display click on the company name: Transcontinental Imprimerie Gagne
10. From the New list select YCS1555-78 Manta
11. On the left hand side, click Connect Customer
12. Click Show Connections
13. After about a second the list will show you as Connected in the Status column
14. Go back to Machine YCS1555-78 information screen by clicking Select Machine on the left and then YCS1555-78 Manta
15. In the information screen scroll down to Connect via Service Shell and
16. You're there!
