1. OVERVIEW

Refer to http://techplanet.creo.com/proofing/integris/nav/parts-tools.htm#tools section for downloading and using TightVNC.

2. INSTALLING

2.1 Installing the Host

ThightVNC Host is located on the ResourceCD 21-0151A or from TechPlanet as listed above.

1) From the ResourceCD copy the W2K_Util\VNC directory to %SystemDrive%\

2) From command line go to **%SystemDrive%\VNC.**

3) Type: VNC <MyComputerName> /user administrator creo

4) Delete the **%SystemDrive%\VNC** directory.

2.2 Installing the client

1) Download the TightVNC Full Installer to a local disk.
http://techplanet.creo.com/proofing/integris/content/troubles/Full_Install.exe

2) Use the password **creo** to unpack the zip file.

3) Run the installer and follow the prompts.

NOTE: by default, the installer loads both client and server onto your computer. It is possible to load the client only.

3. CONNECTING

1) Ensure the service **WinVNC**, normally set to Manual, is **Started** on the Host machine. You can do this by asking the customer to manually start it, or connecting with Terminal Services and starting it yourself.

2) Start TightVNC > TightVNC(Fast Compression) to start your remote session.

3) Enter the **Server Name** or **IP Address** of the Host you want to connect to.

4) Enter the password **cre0rc**
