Technical bulletin

Macintosh OSX Workflow With Brisque

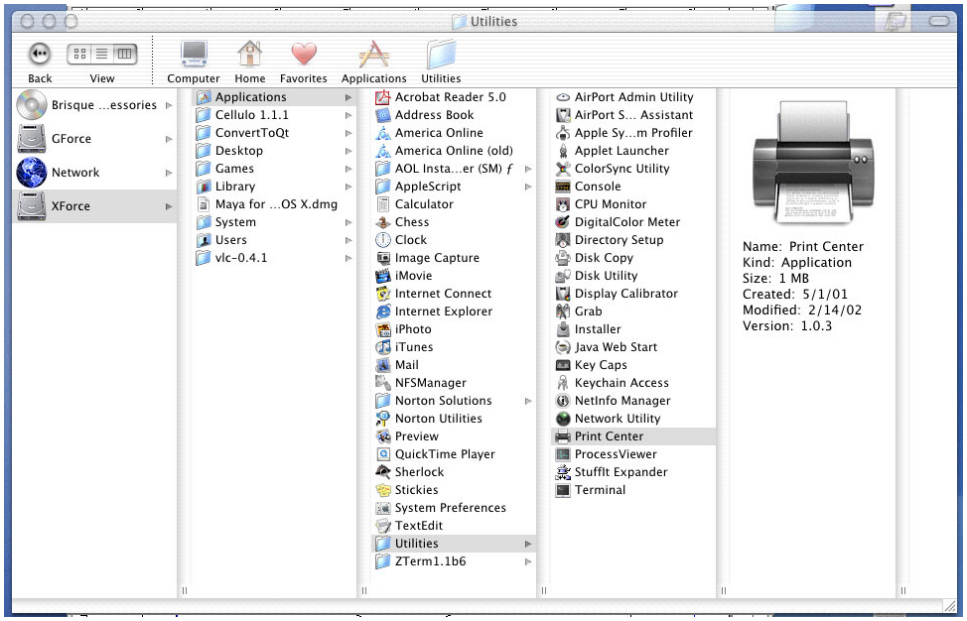

This technical bulletin describes how to define an AppleTalk printer on a Macintosh OSX (Mac OSX) system to a Brisque workstation.

Setting up an AppleTalk on a Mac OSX to a Brisque workstation

1. On your Mac OSX system, from the **Go** menu, choose **Applications**.

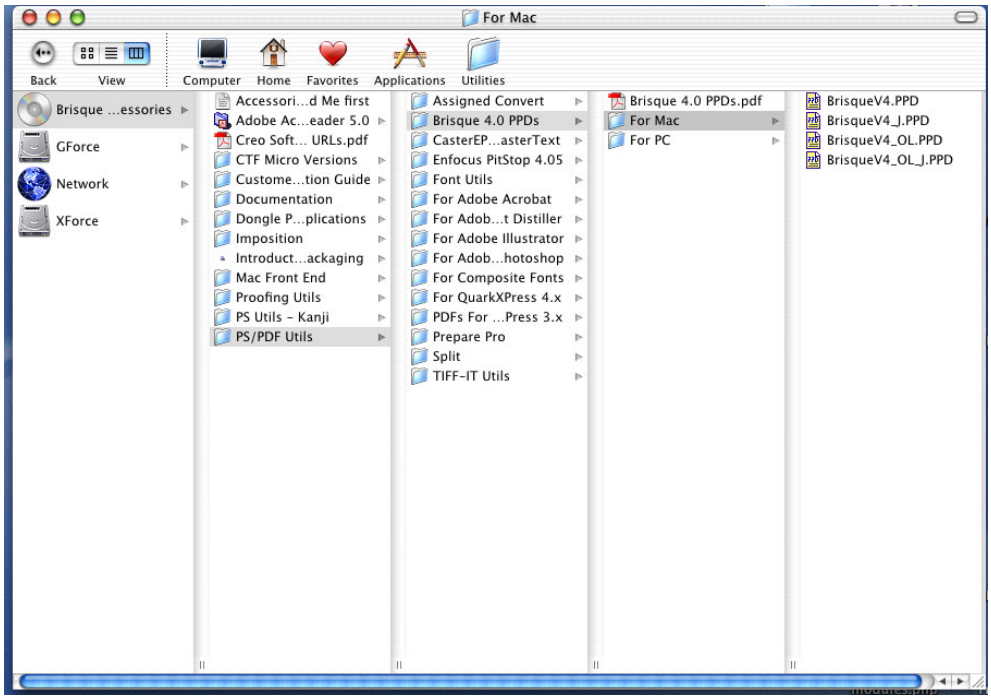

The Utilities dialog box appears.

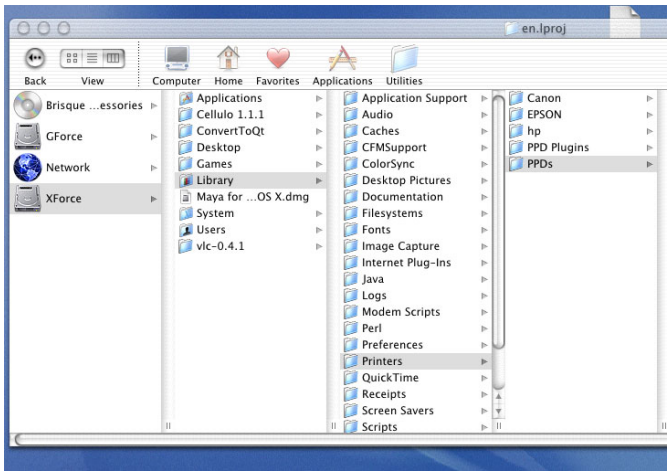

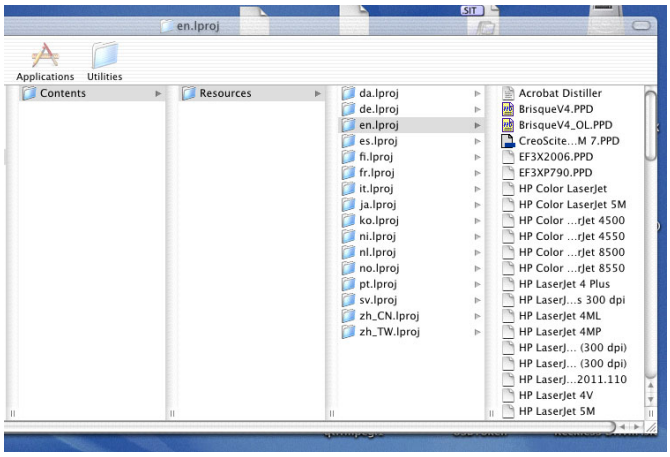

2. Choose **Applications**>**Utilities**> **Print Center**.

3. Drag and drop the Print Center onto your Mac OSX desktop. This will save you from having to repeat steps 1 and 2.
4. Insert the Brisque Accessories CD into the Mac OSX CD ROM drive.
5. On the Desk Top, double-click the CD icon to open the CD.
6. From the PS/PDF Utils, choose the Brisque 4.0 PPD's folder.

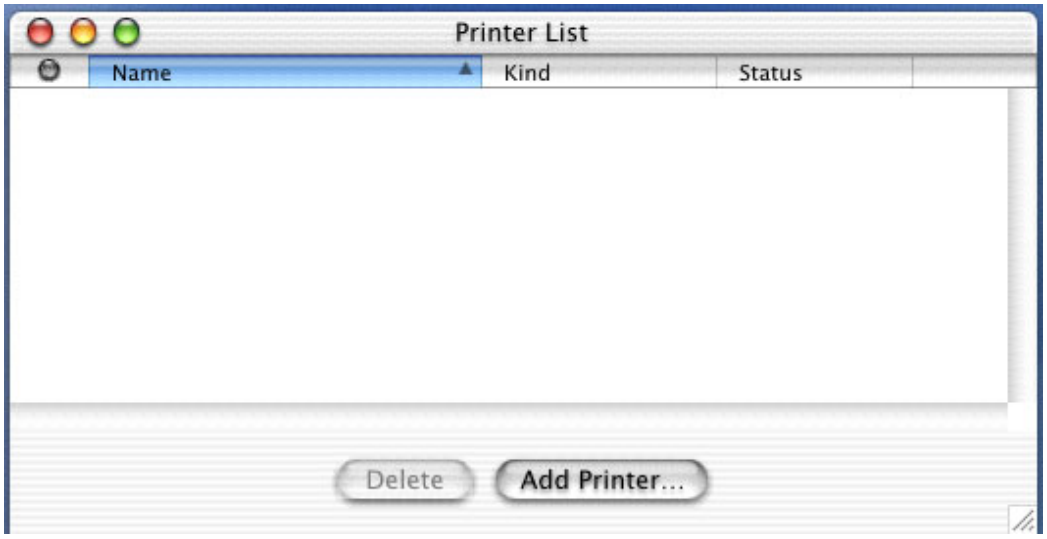

7. Drag and drop the Brisque's ppds to the Mac OSX hard drive /Library/Printers/PPDs/Contents/Resources/en.lpro.j.

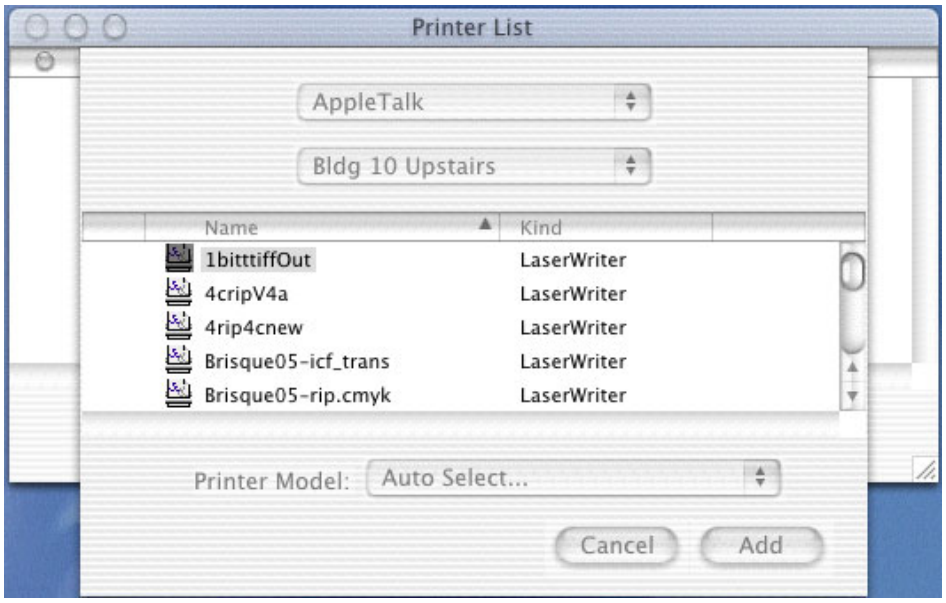

8. On the Desk top, double-click the Print Center icon.

   The Print Center dialog box appears.

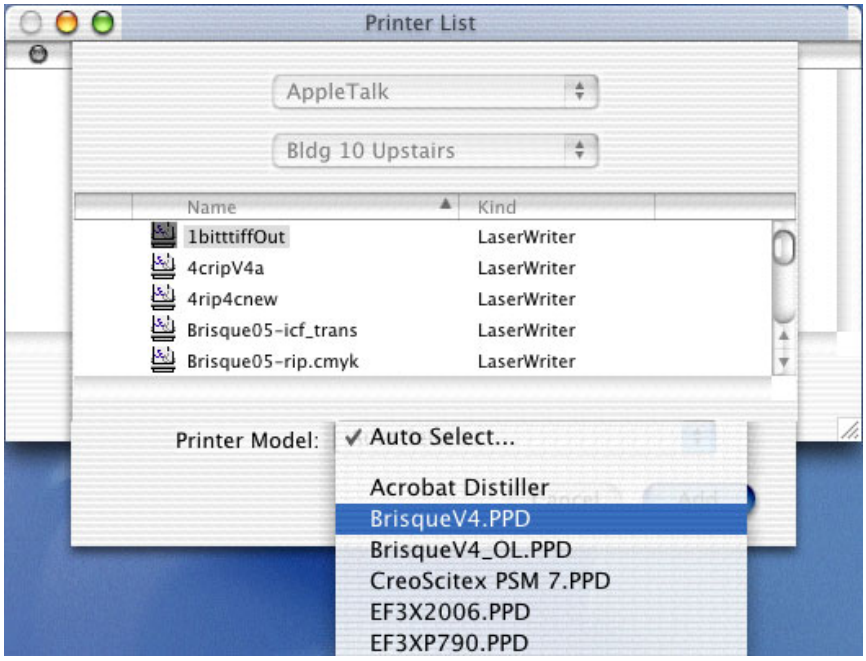

9. Choose the **Add Printer** button.

   The Add Printer - Printer List dialog box appears.

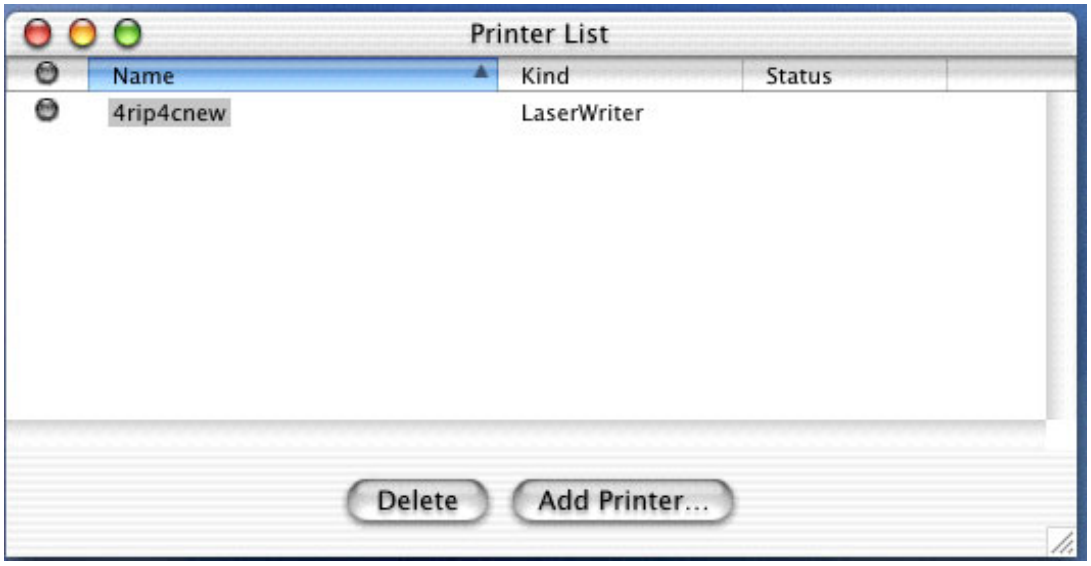

10. In the first box, choose **AppleTalk**.
11. In the **Zone** box (the second box), choose the zone where the Brisque printer is stored.
12. In the **Name** box, choose the Brisque printer.
13. In the **Printer Model** box, choose the Brisque PPD.

14. Click the **Add** button.

    The printer should appear in the Printer List dialog box.

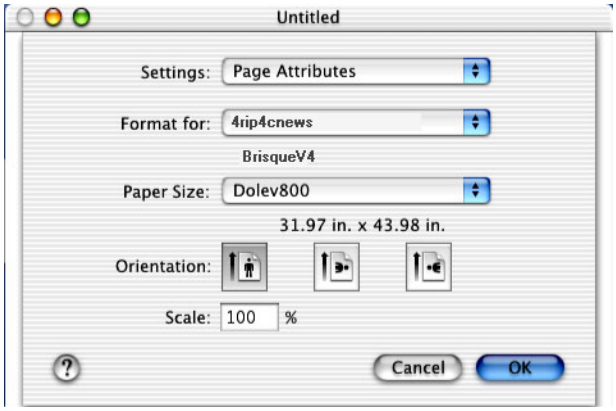

15. Click the **Add Printer**… button.

    Once you have added the printer you cannot modify that printer. You have to delete it and then create a new one.

    Applications such as Illustrator™ 10, InDesign™ 2, or Photoshop™, enable you to select the printer you just defined when you send to print.

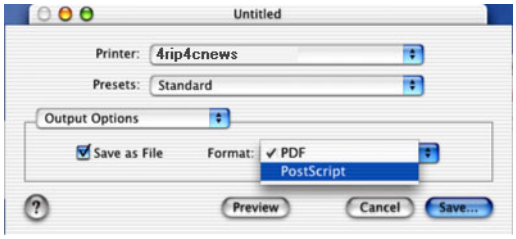

16. From a Desktop Publishing application, for example, Illustrator 10, open the Printer dialog box.

17. From the **Printer Page Setup** menu, choose **Summary**, to check that you are using the correct PPD.

18. In the **Printer** box, select the Brisque hot folder to print directly to the Brisque hot folder.
19. In the **Format** box, choose to print to PostScript or to PDF.
20. Choose the **Save as File** check box, to save the file to disk.

Make sure you have the correct permissions before you log in and try to read and write to folders. Unlike the Mac OS9 system, the Mac OSX system requires you to have the correct user permissions to complete many actions.

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates and proofs; professional color and copydot scanning systems; and workflow management software. Creo is also an Original Equipment Manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers.
