Date: March 15, 2002

Preps (PRO and Plus) 4.1.1 Release Notes for Brisque Impose Users

This document describes the Release Notes relevant to the Brisque Impose workflow only.

For full overview of the Preps package, refer to the Release Notes supplied by ScenicSoft.

Preps Version 4.1.1 supports Mac OS 8.6 through 9.2.

Important Note:
Preps Version 4.1.1 is restricted for use with Brisque version 4.0 and up.

Preps 4.1.1 no longer includes multiple PPDs for separate device configurations. Instead, one PPD contains the device configuration for all Brisque Page sizes. This PPD, and the complimentary PPX, are located at Brisque 4.0 Accessories CD/Dongle Protected Applications/Preps/Brisque PPX and PPD.

New Features and Bugs Fixes

- **Collation mark**
  The font size for text within the Collation, Text and Flat Identifier marks, always returns to the default size when printed, even if you modify the font size. **Corrected**
- The numbers in the Collation Mark allow a single digit only. No more than 9 steps should be defined. **Corrected**

- **Dup mark**
  When using a Dup mark on a template that is to be tiled, the mark is not duplicated after tiling. **Corrected**

- **Offset from Layout Details**
  The positive offset from Layout Details operates as a negative offset. **Corrected**

Documentation

- Brisque Impose documentation is available on the Brisque Brisque 4.0 Documentation CD, supplied with every Brisque station.
- Preps Imposition documentation is available as PDF files on the Preps Version 4.1.1 folder in the *Brisque Accessories 4.0* CD in the following languages: English, French, German and Spanish.

  630P70602 U/G CD, PREPS VER 3.6.1 To PREPS VER 4.1.1

Password

- The full Preps package is supplied with dongle and the needed password.
- When upgrading from a version of Preps lower than v4.0 a new password is required, please contact your local service center for new password.

Known Bugs and Limitations:

- The "Auto Place Tile Marks" option is not supported by the Brisque Impose.
- When you select Page Centered, information that includes offset details sometimes appears in the Run List. Ignore the offset information.
- Exposure Bar mark is not supported by the Brisque Impose workflow.
- The Dashed, Dotted and Solid Line Marks from Preps are not supported in Brisque Impose Workflow.
- The font type for text within the Collation, Text and Flat Identifier marks always return to the default type when printed, even if you modify the font type.
- The following Collation Marks are not supported in the Brisque Impose workflow: sigcolla.eps, sigcollb.eps, sigcolld.eps and sigcolle.eps.

Note
We recommend selecting the Punch system for the selected output device via the Punch dialog on the Brisque DFE, and not from Preps. The punch marks from Preps are not displayed in the Brisque Preview application.
