A. Who should load this update?

Recommended for all Brisque customers using RIP with Version 4.0.97 who are experiencing the symptoms in Section B below.

B. What this update includes?

This update includes Corrections for:

Rip in Specific mode issues:

1. RIP that file with **Specific** selected, in the 2nd page you will see that two different spot colors are merged into one color, if you RIP with **All to Spot** selected it will RIP correctly. **(Case 01528)**
2. If you RIP a file, with the first page includes a spot **EPS** file from Illustrator 8.01 and the second page includes text, with **Specific** selected, the RIP will fail on the second page with an error message: "Abnormal termination of PSRIP". **(Cases 01594, 01721, 01869)**
3. If you RIP a file that includes spot colors, with **Specific** selected, converting some of the spot colors to process via the Spot Extension, the correct colors will not appear after the RIP. **(Cases 01713, 01714)**
4. RIP the file with Specific selected. Instead of outputting only CMYK + 1spot, the RIP outputs CMYK + 4 spots. In the RIP window - Separation section, you can see that only one spot color is defined as separation #5 and all the other spots show "-" in the Separation section. In the Spot Color XT, it shows only one spot color in the list (Pantone 293 CV). However, after the RIP, there are 8 separations in total. **(Case 01206)**

OPI Issues:

1. The RIP results are incorrect for an image in the PS file. This image is placed under a transparent object in **Freehand**. In Brisque V4, it looks like the TIFF is on top of the object. **The workaround was:** To clear the OPI option the RIP dialog box. **(Case 01752)**
2. If you RIP a PostScript file that contains a grayscale TIFF that is colorized with process colors, and it is created using **QuarkXPress** 4.1x with the Creo Color TIFF XT, the grayscale TIFF will disappear. **The workaround was:** To clear the OPI option In the RIP dialog box. **(Cases 01692, 01695, 01660)**

Other Rip Issues:

1. Fixes for RIP PDF/PS files with more than 20 pages using CT Quality selected, was fail in the end of the process.
2. PDF RIP will change the LW Colors compared to the values seen in PitStop. (**Case 01671)**

C. Minimum Requirements:

Should be loaded on top of Brisque version 4.0.97 with the mandatory updates **Upd_Brisque4_97_1 (4.0.97.18)** and **Upd_Brisque4_97_ResetBoard (4.0.97.4)**, both exist on Version 4.0.97 2 of 2 CD and are automatically loaded during the Version 4.0.97 installation process.

Select **Station Info > More Info** and make sure you have the following packages prior to installation:

Upd_Brisque4_97_1 (4.0.97.18)
Upd_Brisque4_97_ResetBoard (4.0.97.4)

D. Additional Notes

This update is to replace the previous Upd_Brisque4_97_RIP - 4.0.97.1 that is available on the Version 4.0.97 2 of 2 CD and will overwrite it when loaded.

E. Loading Instructions

Note: If you've previously downloaded the **update.tar** script and created the **.updates** folder, start at **step 3**.

1. Create a folder on the Brisque named **.updates** under the **FIRST** dataVolumes (example: **/dataVolumes/brisque1.1.0/.updates**

Note: In order to see the **.updates** folder from the Brisque, click View and make sure Show Hidden Objects is selected (or Ctrl + S).

2. Copy/download the script **update.tar** from: ftp://ftpcsa.creo.com/brisque/download/V4/Updates/4.0.97/script/ into the **.updates** folder.
3. Copy/download **Upd_Brisque4_97_RIP_3.tar** from: ftp://ftpcsa.creo.com/brisque/download/V4/Updates/4.0.97/RIP-3/ into the **.updates** folder.
4. Logout from the Brisque application.
5. Login as root/ripro.
   Note: If you've previously installed the **update.tar** script, continue with **step 7**.
6. Type: ***tar -xvf /dataVolumes/brisque1.1.0/.updates/update.tar*** and hit **Enter**.
7. Type: ***update.sh*** and hit **Enter**.
8. Type a period (**.**) in **INPUT device** field and hit **Enter**.
9. Hit [**F4**], select **Upd_Brisque4_97_RIP** and hit **Enter**.
10. Hit **Enter** twice.
11. After the **OK** message, hit the [**F10**] key.
12. Type: **y** and hit **Enter** for automatic reboot.

After rebooting, login as ***cdesci*** and go to **Station Info** --> **More Info** to confirm that: **Upd_Brisque4_97_RIP.obj 4.0.97.3** is listed.
