Technical bulletin

Pandora 2.5 Limitations

The following limitations exist in Pandora 2.5, build 79:

- Using the slider to set the preview resolution in the Preferences dialog box may cause Pandora to stop responding. Avoid using the slider.
- Pandora 2.5 does not support reversed (knocked out) variable text marks.
- You cannot preview bleeds that exceed 0.5" from the trim unless you are running Prinergy 2.1.0.13 and are generating thumbnails in Prinergy.
- There is no automatic station numbering for manual layouts.
- There are no automatic one-up marks for manual layouts.
- You cannot select single stations in a CAD file if boundaries are shared.
- Pandora 2.5 does not run on Mac® OS X in either Classic or Native mode.
- In Pandora 2.0 and earlier, DXF files cannot generate an automatic bleed path based on the shape of the die or automatic station numbering. In Pandora 2.5, the automatic bleed path limitation is fixed. However, the **Apply to All** feature works for Adobe® Illustrator® DXF files only if the original die stations are not rotated. This is because Illustrator DXF files do not contain rotation values, so a rotated die station is seen by Pandora as a different shape.
- Pandora 2.5 does not accept PDF 1.5 files (Adobe Acrobat 6.0).

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates and proofs; professional color and copydot scanning systems; and workflow management software. Creo is also an Original Equipment Manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers.
