Revised March 2004

Pandora 2.6

We are pleased to provide you with the latest version of the Pandora software. This ReadMe file describes the system requirements for Pandora 2.6. For information about installing and using Pandora, see the *Pandora 2.5 User Guide* and *Learning Pandora 2.5*. Because there were no significant changes in the user interface or functionality of Pandora, these documents are not updated for Pandora 2.6. Both documents are on the Pandora 2.6 CD and on the Creo Web site.

Languages

Pandora 2.6 runs in English, French, German, and Spanish. You choose a default language when you first install the software. If you want to change languages after installing Pandora, you can do so by selecting **Preferences** from the **Edit** menu. The *Pandora User Guide* in all four languages is on the CD. *Learning Pandora 2.5* is available only in English.

Pandora and Java

Pandora is a Java®-based application. A Java application can run on many different kinds of computers because it uses a "virtual machine"—a kind of translator that turns general Java instructions into commands tailored for the kind of computer you're using. For Macintosh®, the virtual machine is Macintosh Runtime for Java (MRJ). For Windows®, the virtual machine is Java Runtime Environment (JRE).

Mac OS X comes with Java preinstalled. On Windows, the Pandora installer installs the virtual machine on your computer regardless of whether you already have a virtual machine. This automatic installation ensures that you have the version of JRE that is compatible with Pandora.

Pandora 2.6 System Requirements

Table 1: Pandora 2.6 minimum system requirements.

Macintosh Configuration	Requirement
Computer	Dual 450 MHz G4 Macintosh with built-in USB port CD-ROM drive
Operating system	Mac OS® X 10.3 (Panther)
Available hard disk space	2 GB
Built-in memory	512 MB
Java	Java 1.4.2 (you can install this update automatically by running Software Update from the Apple menu)
Monitor resolution	1024 x 768

Table 2: Pandora 2.6 recommended system requirements.

Macintosh Configuration	Requirement
Computer	Single 1.25 GHz G4 Macintosh with built-in USB port CD-ROM drive
Operating system	Mac OS® X 10.3 (Panther)
Available hard disk space	4 GB
Built-in memory	1024 MB
Java	Java 1.4.2 (you can install this update automatically by running Software Update from the Apple menu)
Monitor resolution	1280 x 1024
