About the Creo Preflight Locator

Use the Creo Preflight Locator to link directly from the PDF Preflight report to the exact location of the problem in the preflighted document.

For information on how to preflight pages and open the PDF Preflight report, see the Prinergy Workshop online help.

Enabling the Creo Preflight Locator

You can enable the Creo Preflight Locator when the PDF Preflight report is open in Adobe Acrobat. Fom the **Tools** menu (Adobe Acrobat 6.0 and earlier) or the **Advanced** menu (Acrobat 7.0), click **Creo Tools**. A check mark next to **Creo Preflight Locator** indicates it is enabled. If there is no check mark, select **Creo Preflight Locator** to enable it.

Opening the Creo Preflight Locator

You open the Creo Preflight Locator from the PDF Preflight report. Click the blue hand (☞) next to the problem you want to view (Figure 1).

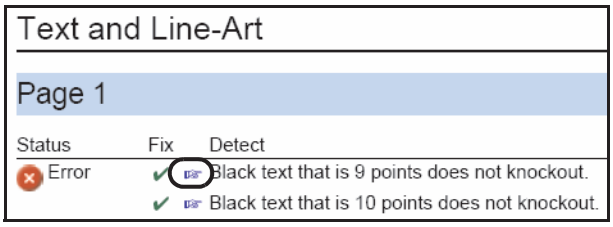

Figure 1: Sample PDF Preflight report

The PDF document opens; the first instance of the problem is highlighted with a green border (Figure 2). The Creo Preflight Locator dialog box also opens, displaying:

- The type of problem (warning or error)
- A description of the problem
- A page reference for the problem
- The number of instances this problem appears in the document

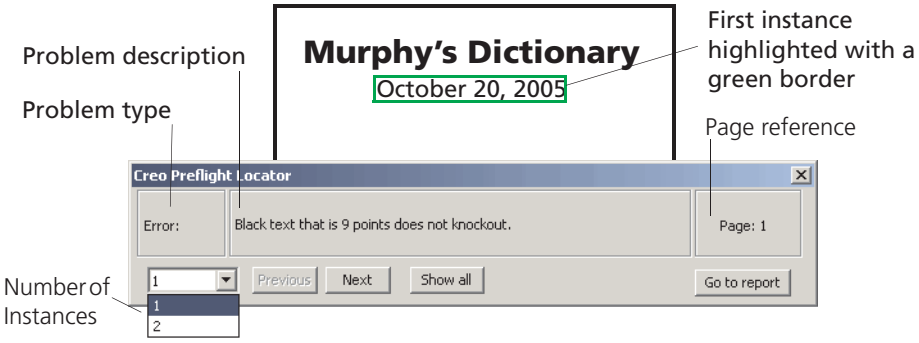

Figure 2: Sample preflighted page with Preflight Locator dialog box

To highlight another instance of this problem, select a number from the list, or click **Previous** or **Next**. To highlight all instances of the problem at the same time, click **Show all**.

Returning to the PDF Preflight Report

To return to the PDF Preflight report, click **Go to report**.
