Technical bulletin

Running a Different Prinergy Variant (Powerpack or Connect) on the Client Than Is Running on the Server

This technical bulletin describes how to modify the product code on a Prinergy® Workshop client so that the client runs the Prinergy Powerpack® variant of Workshop when the Prinergy primary server is running the Prinergy Connect® variant—and vice versa. This procedure benefits customers who run a mixture of commercial and packaging work using Prinergy versions 2.2, 2.3, or 3.0.

To run a different variant on the Prinergy Workshop client:

1. Open a file browser and browse to the **Login.props** file.

   The path to the **Login.props** file changes depending on the platform and version of Prinergy that is installed. Use the following table as a reference when browsing for the **Login.props** file.

Platform, OS	Prinergy Version	Location of Login.props File
Windows®	2.2 and 2.3	**C:\Program Files\Workshop\Contents\Resources\Preferences**
	3.0	**C:\Documents and Settings\<NT user name[1]>\Application Data\Creo\Workshop** **Note**: The **Application Data** folder may be hidden. To show hidden folders in Explorer: 1. From the **Tools** menu, select **Folder Options**, and select the **View** tab. 2. Under **Hidden Folders**, select the **Show hidden files and folders** option and click **OK**.

[1] The <NT user name> is the name of the user logged into the Windows session. This may or may not be the same user that is logged into the Prinergy Workshop client.

Platform, OS	Prinergy Version	Location of Login.props File
Mac OS 9	2.2 and 2.3	**<drive:>/System Folder/Preferences/Araxi**
	3.0	**< drive:>/System Folder/Preferences/Creo/Workshop**
Mac OS X	2.2 and 2.3	**< drive:>/Applications/Prinergy Workshop/Contents/Resources/Preferences**
	3.0	**< drive:>/Users/<user name[2]>/Library/Application Support/Creo/Workshop**

2. Open the **Login.props** file with a text editing tool.
3. Anywhere in the file, press ENTER to start a new line, and type the applicable product override code:

To Switch To	Type This
Powerpack	`ProductCodeOverride=PK`
Connect	`ProductCodeOverride=CN`

4. Save and close the **Login.props** file.
5. Start Prinergy Workshop and log in.
   Note: The Prinergy Workshop splash screen may not accurately display the product you switched to. This is a known issue and can be ignored.

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates, and proofs; professional color and copydot scanning systems; workflow management software; and proofing and printing consumables. Creo is also an original equipment manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers. Creo trades under the symbols CREO on NASDAQ and CRE on the Toronto Stock Exchange. www.creo.com
