Prinergy Acrobat Plug-Ins for Adobe Acrobat 7.0

What's new about Prinergy Acrobat 7.0 Plug-ins?

- For the Prinergy® Acrobat 7.0 plug-ins, the menu location to access the Creo plug-ins is now **Advanced > CreoTools** instead of **Tools > CreoTools**. The toolbar of icons can still be found under **View > Toolbars > CreoTools**.
- The plug-in names have changed.
    - The new plug-ins only work in Adobe® Acrobat® 7.0, whereas the older versions were compatible with earlier versions. To distinguish them, the new plug-ins have the number "7" in their file names. For example, "CreoToolsPro7.api" is the name of the Trapper/Dotshop/Separation viewer plug-in and only works in Acrobat 7.0, while "CreoToolsPro.api" works in Acrobat 6.0 and earlier versions.
    - The Macintosh® OS X versions now have file names that have the extension ".acroplugin". Previously, Mac plug-ins had no extension. Microsoft Windows® versions have the file name extension ".api".
- The appearance of the tables in the Mac OS X versions of the PDF Trapper and Dotshop™ have changed. These changes were unavoidable, due to the plug-in architecture changes in Acrobat 7.0. The tables were not re-built to look the same because of the length of time this additional work would have required, resulting in delays with shipping.

- For the Prinergy Acrobat 7.0 plug-ins, the PDF Trapper Inks table in the Trap Page dialog box now has abbreviated column titles (the size of the columns can still be adjusted). The buttons that allowed the Step Limit and Trap Color Scaling to be set to the same value have been removed and now these values must be entered separately for each.

Installing plug-ins for Mac OSX

1. In <volume>/Applications/Adobe Acrobat 7.0 Professional/, choose **Acrobat 7.0 Professional** and press **<cmd> plus I**, or from the File menu, select **Get Info**. The Acrobat 7.0 Professional Info dialog box appears.
2. Click **Plug-ins**. A list of installed plug-ins appears.
3. Click **Add**.
4. Unstuff the plug-ins from the file "Acro7Plugins_Mac.hqx". Browse to the location where you unstuffed the plug-ins and choose **all plug-ins**.
5. Click **Choose**.
6. Close the Acrobat 7.0 Professional Info dialog box.
7. Re-open the Acrobat 7.0 Professional Info dialog box.
8. Click **Plug-ins** to verify that the Prinergy plug-ins were installed and are listed.

Installing plug-ins for Windows

1. Unzip the plug-ins from the file "Acro7Plugins_PC.zip".

2. Copy the plug-ins to <drive>\Program Files\Adobe\Acrobat 7.0\Acrobat\Plug_ins\Prinergy. (<drive> is the disk drive that Adobe Acrobat is installed on, typically C:\).
