Defining User Settings Before Installing PS/M 8.0

Mac OS® X enables you to work in a multiple-user environment. However, this feature can affect the functionality of PS/M 8.0, especially permission limitations. It is important that you are aware of these implications before installing PS/M version 8.0.

To avoid permission limitations on different workstations, we recommend that all PS/M workstations on the site have the same user name and password. It is also important that you create a new user and define user settings before installing PS/M 8.0, as described in the following procedure.

To create a new user and define user settings before installation:

1. Select **System Preferences** > **System** > **Accounts** > **New User**. The Accounts dialog box appears.

2. In the **Name** box, type `PSM8` (case-sensitive).
3. In the **New Password** box, type `PSM8` (case-sensitive).
4. In the **Verify** box, type the password again.

5. Select the **Allow user to administer this computer** check box to assign the user with administration permission. This permission is required in order to install the application.
6. If the PS/M site is a mixed Macintosh® and Windows® environment, select the **Allow user to log in from Windows** check box.

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates and proofs; professional color and copydot scanning systems; workflow management software; and proofing and printing consumables. Creo is also an original equipment manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers. Creo trades under the symbols CREO on NASDAQ and CRE on the Toronto Stock Exchange. www.creo.com
